Games:	Number Sheet
1. Aces.....	1
2. Alphabet Soup.....	2
2A. Backboard Dodge Ball.....	2A
3. Bean Bag Relays.....	3
4. Bell Bounce.....	4
5. Bridge Tag.....	5
6. Cannonball Run.....	6
7. Chain Reaction.....	7
7A. Chariot Races.....	7A
8. Chinese Wall.....	8
9. Chuck the Chicken.....	9
10. Circle to Circle.....	10
11. Clear Out.....	11
12. Clothespin Tag.....	12
13. Clown Tag.....	13
14. Color Tag.....	14
15. Corners (numbers on the 'ghetto blaster ' cart).....	15
15A. Cross the River.....	15A
16. Crows and Cranes.....	16
17. Deck of Fun (cards and activity cards on hallway cart).....	17
17A. Doctor Doctor Dodge Ball.....	17A
18. Dominoes (dominoes on the hallway cart).....	18
19. IT Tag.....	19
19A. Kings and Queens.....	19A
20. Musical Hoops.....	20
21. Noodle Tag.....	21
22 Noses (5)	22
23. Pip, Squeak, Wilbur.....	23
24. Poison Tag.....	24
25. Popcorn.....	25
26. Power Wall.....	26
27. Rats and Camels.....	27
28. Roll the Dice.....	28
29. Run Octopus Run.....	29
30. Ship Ahoy.....	30
31. Shuffleboard Push up.....	31
32. Snake Pit.....	32
33. Tail Tag.....	33
34. What time is it Mr. Fox? (different fromMr. Wolf!!!).....	34

- **1. Aces**

- Equipment: a deck of cards for each group (remove the J,Q and K)
- Space: classroom, gym, outside
- Make four teams and each team goes to a corner. One person on each team is the designated dealer
- Dealer gives each member a card.
- Each member runs and challenges another member from another team with their card. Whoever has the highest card gets to take both cards back to their dealer. Dealer takes the cards and hands out another one. If the cards are the same number then they do Rock Paper Scissors to determine who takes the cards. The person who loses their card just returns to their dealer for another one. All cards are taken back to the dealer who puts them on the bottom of the pile and then deals out a new card to their member.
- If a person is dealt an Ace he or she can run to any other dealer and take half their deck. Then s/he returns the cards to his or her dealer.
- The game is over after a set amount of time or until a group runs out of cards. Then the dealer counts the cards and a winner is determined by whoever has the highest card count.
- Dealers remain at their corner. They do not move.

- **2. Alphabet Soup**

- Equipment: large letters of the alphabet
- Space: classroom, gym, outside
- Hang up the alphabet around the gym in alphabetical order.
- The students move from letter to letter by using different modes of locomotion.
- Once finished they return to a designated spot.
- Have the students do this individually or in partners.
- The students spell whatever is decided upon. Here are some suggestions: first name; last name; favorite thing/colour/food/show etc; spelling words; provinces; nutritional snacks;

2A Backboard Dodge Ball

1. Set the gym up as per diagram.
2. Divide the class into two teams.
3. Students start by lying on their stomachs on the black/red sidelines. Teacher calls 'GO'. Students run up to the pylons, take the ball and run back to touch the wall. Once they have touched the wall they can now throw the ball. (This is only done at the start of a game.)
4. If a student is hit below the shoulders before the ball touches the ground they must go to 'prison' which is the pylon in the corner of the opposing team's court. This also happens to a thrower if his/her ball is caught by the opposing team before the ball touches the ground. Prisoners need to line up behind the pylon in order of being hit.
5. One prisoner at a time is freed when her/his team mates hit the basketball backboard or net with a ball. If the team makes an actual basket then all the prisoners are freed at once.
6. The game is over when all of a team is in prison at once or when there is only one player left or time is up.
7. Held balls can not be used to deflect incoming balls.

- **3. Bean Bag Relays**

- Equipment: Beanbags
- Students are sitting in rows of desks.
- The first person has a beanbag on the desk. The beanbag is passed over hi/her head to the next person and so on to the back of the row.
- The last person in the row runs to the front of the room and touches the wall/board. While this person runs to the front the rest of the row is moving one desk back.
- The runner then sits in the front desk and begins passing the beanbag again. This continues until everyone is back in their own desk or a designated time.
- Vary the way the bean bag is passed-over and under, sideways

- **4. Bell Bounce**

- Equipment: none
- Space: classroom
- At each bell for a class change, have the students jump up and do a pre-arranged activity.
- Be specific. Post a list on the board. Have students come up with ideas for day/week.
- Here are some ideas: ten jumping jacks; hands on the desks on either side, lift legs and peddle; 20 scissor lunges; 20 squats etc.

- **5. Bridge Tag**

- Equipment: none
- Space: gym, outside
- This is like frozen tag except when tagged the student freezes into a bridge formation. Then to be unfrozen someone must go under the bridge. You can specify that two-legged bridges are not allowed just so that the students have to be more creative.

- **6. Cannonball Run**

- Equipment: lots of playground-type balls
- Space: gym, maybe outside but it would be harder to contain the thrown balls
- Use the length of the gym. Everyone lines up at one end. Have two people be the ball throwers.
- Ball throwers are on either side of the length of the gym. Choose a line in which the throwers must throw from.
- On the command 'cannonball run' the students run to the other end of the gym. If a ball hits them at anytime, anywhere on their bodies before they get to the end they are caught and go get a ball and join the throwers. Balls are 'live' until everyone is behind the safety line.
- Game is over once everyone is caught or the time is up.
- The number of balls in play equals the number of throwers. Otherwise no one can have two balls to start with. Balls should be gathered from the floor before anyone gets one out of the box.
- Throwers can grab other thrown balls and throw again as long as they throw from the designated line.

- **7. Chain Reaction**

- Equipment: 10-15 playground balls
- Space: gym, outside
- Everyone is for themselves. Grab a ball and throw it at someone. Must hit them below the shoulders. If hit that person must sit down. The hit person can still throw balls.
- If a sitting person hits another person than they are free and can run again.
- The chain reaction happens when several sitting people pass the ball to each other in order to get someone hit. Once they hit the person then all the people in the 'line' are freed.
- Play the game for a designated time.

- **7A. Chariot Races**

- *Equipment: one hula hoop for every 2 students

- *Space: gymnasium or outside

- *Students partner up with one partner retrieving a hula hoop.

- *Everyone lines up at the end or side of the playing area. One partner is in the hoop (horse) and the other partner is behind him (outside the hoop) holding the hoop (driver).

- *Each pair must run to the other side without letting go of the horse/hoop or dragging the horse or driver, switch positions and run back.

- *Variation: Once the students are ready to go again, have all the drivers move one horse/person to the right or left. Person at the end of the line goes all the way to the other end to gain another partner. The horse and hoop remain in the same place **only the drivers move.**

- **8. Chinese Wall**

- Equipment: 16-20 pylons
- Space: gym, outside can be as large or small as you would like
- Place the pylons so that they run down the length of the gym in two rows. Think of it as an alley which is 2-3m wide and runs down the center length of your playing area.
- Talk about the China Wall. How it was built to keep one group of people out of the land. The wall goes on for miles and they had guards on the top of the wall.
- Now explain that the 'alley' is the China wall. You will need 2-4 guards on the wall. These guards can not come off the wall (outside of the pylons).
- Everyone else lines up against the wall. When the guards yell 'Climb the Wall' that is the cue for the class to run through the wall to the other side.
- Now if anyone gets tagged as they are 'on' the wall they are caught and must help the original guards on the next call over.
- If a climber puts his or her foot into the wall (past the pylons) they must continue through the wall. They can not pull back out.
- The climbers are safe once they get over the wall (through the alley). Then they line up on the other side and get ready to be called over.
- If they are taking too long to run through the wall, just count backwards from 5 and they must be through the wall by 0 or they are automatically caught.
- Play for time or until everyone is caught or until it is not very safe for the few students who are left.

- **9. Chuck the Chicken (Pitch the Pig, Fling the Fish)**
 - Equipment: rubber chicken/fish/pig/ball
 - Space: gym or outside
 - Divide students into groups of 8-10. Each group will be playing against one other group, while one team is on offense, and the other is defense. The team on offense starts with the 'chicken'. One shouts 'Chuck the Chicken' and throw the rubber chicken wherever they like in the playing area. The team then stands in a very tight circle while one person travels around the circle scoring 'runs'. The entire team counts the number of runs until they hear 'Chuck the Chicken'. The team on defense runs to the chicken, wherever it was thrown. They line up in a single file and pass the chicken alternating over the head and between the knees until the chicken reaches the end of the line. The last person in line then shouts 'Chuck the chicken'. and throws the chicken to a new location. The teams then switch roles and continue to score as many runs as possible.
 - The same student is not allowed to throw the chicken, or score more runs until each person on the team had taken a turn.
 - Team with the most runs wins though they usually forget to count.

- **10. Circle to Circle**

- Equipment: 1 hula hoop per group
- Space: classroom, gym, outside
- Divide class into groups of 5-10
- Each group forms a closed circle. Send a hula hoop around the circle without letting go of hands.
- Variation: use two hoops going in opposite directions; see how many times around the circle they can pass the hoop in a designated time.

- **11. Clear Out (Snowball fight indoors!)**
 - Equipment: recycled paper, marker of some sort
 - Space: classroom, gym, outside
 - Provide each student with a few pieces of recycled paper and a felt pen.
 - Each student chooses a word with two or more syllables associated with (you choose i.e. Canada). Each syllable is written on a different piece of paper and crumpled to make 'snowballs'. Or use a sentence that is split in half and written on two separate sheets of paper.
 - Divide the students into two teams-one team on each side of the room.
 - Have a game of 'clear out' with the snowballs. For one minute each group attempts to throw all the snowballs to the other side of the room.
 - At the end of one minute the students open one of the snowballs near them. The challenge is for each student to find another student or two who has a syllable that will connect with theirs to make a word/sentence.
 - List the words/sentences on the board if you want.
 - Crumple the snowballs and try again. How many new words/sentences can be added to the list?

- **12. Clothespin Tag**

- Equipment: 2 or 3 clothespins per person
- Space: gym, outside
- Have everyone stand in a circle. Give each person 2 or 3 clothespins. They attach them to the person in front of them. The pins should be pinned between the person's shoulder blades. If a person has long hair pin below the hairline. Pins must be visible.
- Then have everyone find personal space. On 'go', everyone tries to take the pins off each others' back. Only one pin can be removed at a time. Students can not grab onto others or clothing, only the pin.
- The removed pins are then pinned to the front of the person who removed it. Pins on the front are safe pins. No one can remove them.
- After a set amount of time stop the game. See who still has pins on their back and then see how many pins each person removed.

- **13. Clown Tag**

- Equipment: none
- Space: gym, outside
- 2-3 students are it. When they tag someone that person must place their hand on the tagged spot and then help to tag others. A tagged person must at all times keep their hand where they were tagged while they run around to tag others.
- Game is over when everyone has been tagged.

- **14. Colour Tag**

- Equipment: As many sets of coloured pinnies as available, stop watch
- Space: gym, outside
- The number of teams will be determined by the number of different coloured pinnies that you have. Four teams work well.
- One team is 'it' and gathers in the middle of the play area. Everyone else finds personal space.
- Say 'go'. Time to see how long the tag team takes to tag everyone.
- Continue this until every team has been the tag team.
- Have the teams remember their time.
- Once you have explained the game ask them to guess which team will be the quickest and why? Then after all have been the tag team discuss why the winning team won.

15. Corners

- Equipment: 6 cards numbered 1-6, cd player, upbeat music or a whistle
- Space: gym, classroom, outside
- Tell the students the number of each corner. Tell them that they have 3 lives each. They are to move around (can designate how they move) until you blow the whistle or the music stops.
- At that point they are to run to a corner. You will hold up a numbered card. If they are in that corner they lose a life.
- When they have lost all three lives they must go off to the side and do a physical activity (run in place, jumping jacks, sit ups, push ups, variation) until the end of the game or until you tell them they can join back in with three lives again.
- At the end of the time have the students show you with their fingers how many lives they still have.

- 15A. Cross The River

- *Equipment: none

- *Space: gymnasium or outside

- *Have all the students line up at one end of the space.

- *Pick 2-4 taggers who move to the center.

- *The taggers will call, " Cross the river if you are wearing...."

- (Here they will say a colour.)

- * IF students have this colour on their shirt he/she may walk across the river. Taggers can not tag them. (The colour must be on their shirt and be visible.)

- ****But*** if the students do not have the colour on their shirt they must run across the river and try to get to the otherside without being tagged by a tagger.

- *All students who are tagged join the other taggers in the middle for the next call over.

- *Game is over once everyone is caught or time is up.

**Note: If you have a class over 30 you may want to call only part of the class over at a time ie. all girls, all boys, from class 1A etc. Once the runners get below 30 then they can all go at once again.

- **16. Crows and Cranes**

- Equipment: none
- Space: gym, outside
- Make two teams. Players lay on their stomachs, hands down by their sides and legs straight out, chins on a designated line. The teams should only be about 2 m apart facing each other.
- Give the teams their names-Crows for one team and Cranes for the other. Each team's safety line is behind them
- Call out one of the names. The team called chases the other team trying to tag them before they reach their safety line. Anyone caught joins the tagging team.
- The students love it when you call out words other than their name such as crackers, crumbs, crocodiles, etc.

- **17. Deck of Fun**

- Equipment: one deck of cards (J,Q, K removed) per team, activity card per team
- Space: gym, classroom, outside
- Activity card would give an activity for each suit. (Could do this as a class)
 - E.i. clubs-jumping jacks (cardio)
 - spades-quad stretch (flexibility)
 - hearts-sit ups (endurance)
 - diamonds-push ups (strength)

Each group of 4-6 students is given a deck of cards (or half a deck). On the signal

to begin the group leader deals each member one card (including himself) and then

the remainder of the deck is placed on the floor.

Simultaneously everyone turns over his or her card. Each student is then challenged to complete the activity on the card. (E.i. 10 of spades = holding a quad stretch for 10 sec. on each leg, 6 of hearts = 6 sit ups)

Once they have all completed their activity, they place their used cards in a discard

pile and the entire group runs and touches a set amount of walls or points in a room.

Once they have returned back to their deck the dealer hands out another card to

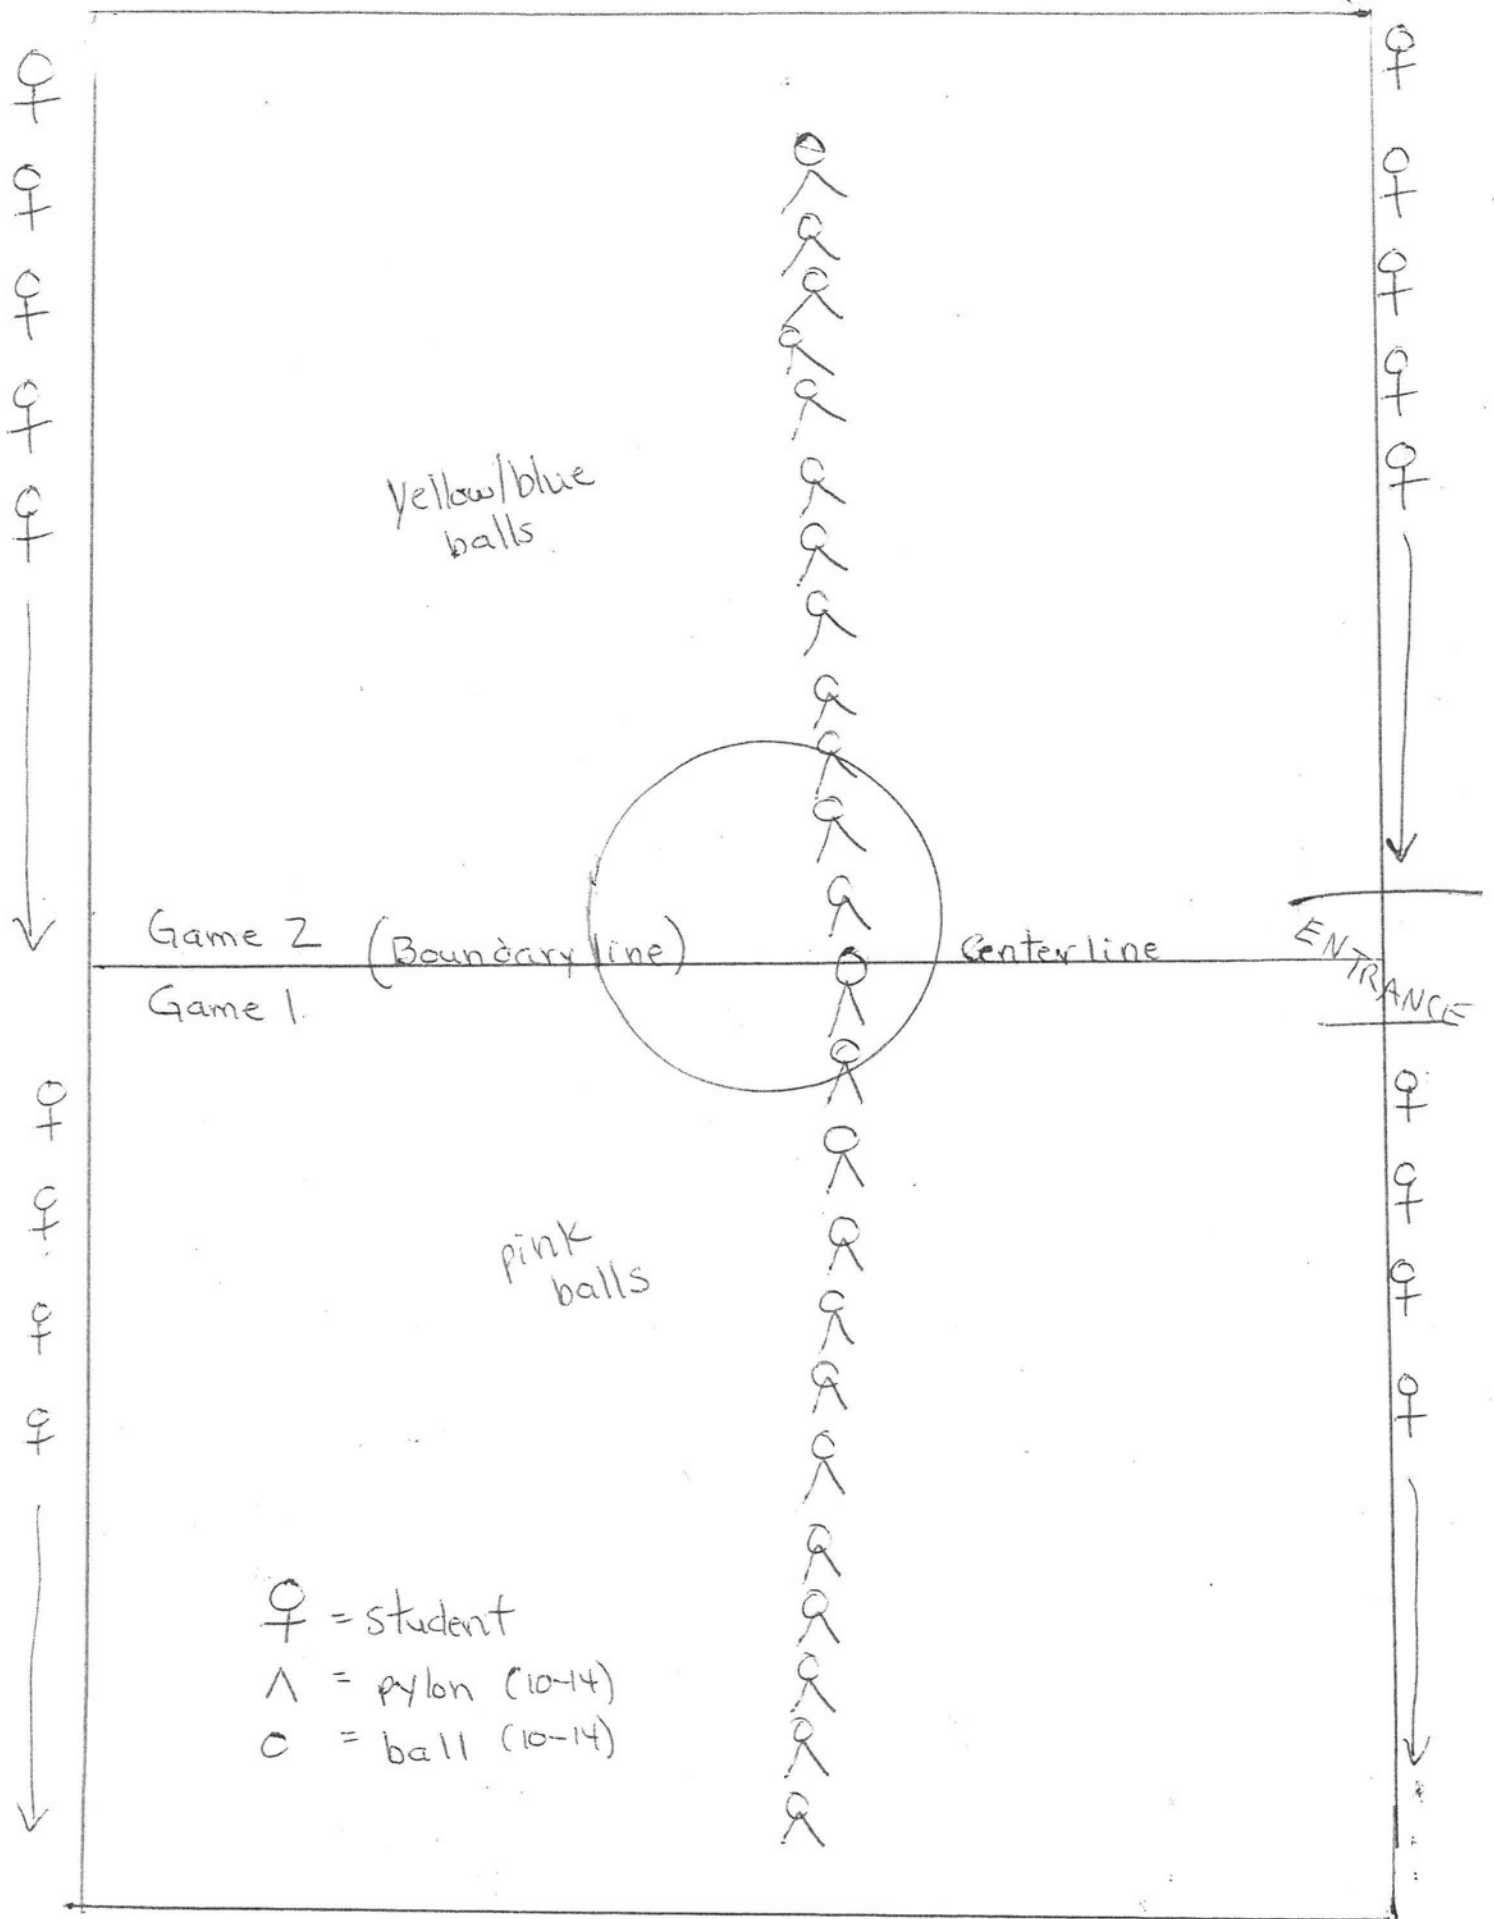

each member. Now if a member turns over an Ace then no one has to do their card and they just place them in the discard pile and the dealer hands out another card.

The challenge of the game is to see how fast they can complete their deck of activities.

17A Doctor Doctor Dodge Ball

1. Set the gym up as per diagram.
2. Divide the class into two teams if playing one game or 4 teams if playing two games. Have each team pick two doctors.
3. Students start by lying on their stomachs on the black/red sidelines. Teacher calls 'GO'. Students run up to the pylons, take the ball and run back to touch the wall. Once they have touched the wall they can now throw the ball. (This is only done at the start of a game.)
4. If a student is hit below the shoulders before the ball touches the ground they must sit down. This also happens to a thrower if his/her ball is caught by the opposing team before the ball touches the ground. A sitting player can not catch, throw or hold a ball.
5. To be freed the player must be touched by their team's doctor.
6. Doctors can free each other but if both are down at the same time then the team no longer has doctors and no one can be freed. The standing team members must now try to keep from being hit and try to eliminate the other team before their team is.
6. The game is over when all of a team is down or time is up.
7. Held balls can not be used to deflect incoming balls.

NA↑

- **18. Dominoes**

- Equipment: 21 dominoes, 21 activity cards
- Space: gym, outside
- Make up 21 dominoes and 21 activities (though you could duplicate activities). Place around the room/gym.
- Use any size of dice. Partners/groups roll 2 dice and then run to the wall where the matching domino is.
- Do what the activity says. Number of repetitions should be determined before the game begins. I.e. use the lowest or highest of the 2 numbers; difference between the two numbers; multiply the numbers (makes for a max. of 36)
